Reviewer's report

Title: Nuclear Receptor Coregulator SNP Discovery and Impact on Breast Cancer Risk

Version: 2 Date: 31 October 2009

Reviewer: Nobuyuki Hamajima

Reviewer's report:

The authors responded the previous comments appropriately. Additional minor comment is:

The term "cohort" is used specifically in Epidemiology. It would be better that the subheading "Genotyping cohort" is replaced with "Subjects". In addition, the deletion of "study cohort" in "A case-control study was conducted investigating a German familial breast cancer study cohort." is recommended, if there is no special reason.

Level of interest: An article whose findings are important to those with closely related research interests

Quality of written English: Acceptable

Statistical review: No, the manuscript does not need to be seen by a statistician.

Declaration of competing interests:

I declare that I have no competing interests.
