Reviewer's report

Title: Risk of urinary bladder cancer: a case-control analysis of industry and occupation

Version: 1 Date: 2 October 2009

Reviewer: Kazunori Namiki

Reviewer's report:

The manuscript describes the results of risk of urinary bladder cancer in a case-control analysis concerned with industry and occupation.

It has been carefully reviewed.

What the authors estimated the risk by the duration of employment can be evaluated. However there were no especial new results except that.

The number of General farmers in the text is different from that in the table. Please check it again.

Level of interest: An article whose findings are important to those with closely related research interests

Quality of written English: Acceptable

Statistical review: Yes, but I do not feel adequately qualified to assess the statistics.

Declaration of competing interests:
