Reviewer's report

Title: High resolution human leukocyte antigen (HLA) class I and class II allele typing in Mexican mestizo women with sporadic breast cancer: case-control study.

Version: 2 Date: 19 December 2008

Reviewer: Xiongwen Wu

Reviewer's report:

Improvement has been made in the revised manuscript, I think this work is acceptable for publication if the following revisions are made:

1. Page 13, last sentence of the first paragraph, "We are able to state that both groups obtained......", is confusing.

2. Page 17, in the section of conclusion, "......and confirms that the relevance of HLA-DR alleles......", is confusing.

Level of interest: An article whose findings are important to those with closely related research interests

Quality of written English: Acceptable

Statistical review: Yes, and I have assessed the statistics in my report.
