Reviewer’s report

Title: Two mechanisms of the enhanced antibody-dependent cellular cytotoxicity (ADCC) efficacy of non-fucosylated therapeutic antibodies in human blood

Version: 4 Date: 5 June 2008

Reviewer: Roy Jefferis

Reviewer’s report:

The authors have made a detailed and extensive revision of the manuscript in response to reviewers comments. Unfortunately, I seem to have "lost" original comments; however, this manuscript is distinct from previously published data from the group. It should be published but still requires some editorial attention.
