Reviewer's report

Title: Two mechanisms of the enhanced antibody-dependent cellular cytotoxicity (ADCC) efficacy of non-fucosylated therapeutic antibodies in human blood

Version: 4 Date: 3 June 2008

Reviewer: Francisco Hernandez-Illaliturri

Reviewer's report:

The authors had addressed the concerns raised by the reviewers. The structure of the manuscript is stronger and fits the vision of this Journal. I motion to approve its publication.

No major concerns were found in the second version.

Minor comments:

1. Figure 3, it should important to known what cells are being gated in the histogram...May be the legend can be formatted.

Level of interest: An article of importance in its field

Quality of written English: Acceptable

Statistical review: No, the manuscript does not need to be seen by a statistician.
