Reviewer’s report

Title: Randomised Phase I/II trial assessing the safety and efficacy of radiolabelled anti-carcinoembryonic antigen I131 KAb201 antibodies given intra-arterially or intravenously in patients with unresectable pancreatic adenocarcinoma

Version: 2 Date: 23 December 2008

Reviewer: David V Gold

Reviewer’s report:

No revisions are necessary as this manuscript should be rejected.

Level of interest: An article of insufficient interest to warrant publication in a scientific/medical journal

Quality of written English: Acceptable

Statistical review: No, the manuscript does not need to be seen by a statistician.

Declaration of competing interests:

While I believe I have given a fair assessment of the manuscript in comparison to the published literature in this field, I am stating for the record that I have published in this field employing a separate antibody for radioimmunotherapy of pancreatic adenocarcinoma and am involved in patent application relating to the field of radioimmunotherapy of pancreatic adenocarcinoma employing a separate antibody.
