Reviewer's report

Title: Loss of heterozygosity and genomic dosage alteration of TRIM3 in malignant gliomas

Version: 1 Date: 15 October 2008

Reviewer: Jafri Malin Abdullah

Reviewer's report:

This is a well written paper but needs a little bit more statistical analysis of the data no Table One and thus the discussion that will follow what the statistical results will show and also the comparison with other previous publications. This would be added information that could lead to a conclusion that LOH is different in populations around the world.

Level of interest: An article whose findings are important to those with closely related research interests

Quality of written English: Acceptable

Statistical review: No, the manuscript does not need to be seen by a statistician.

Declaration of competing interests:
