Title: Synthetic Fiber from a Teddy Bear Causing Keratitis and Conjunctival Granuloma: Case report

Version: 1 Date: 6 April 2011

Reviewer: MEE KUM KIM

Reviewer’s report:

Dr. MK Farooq described case report entitled "Synthetic Fiber from a Teddy Bear Causing Keratitis and Conjunctival Granuloma" It is interesting report mentioning an unexpected association between diseases or symptoms. It looks acceptable to publish with major compulsory revisions.

The figures of both 2 cases seemed to be important how to present such an synthetic fiber related granuloma. I suggest it had better include slit lamp microscopic photos and fluorescein photos of both cases. If the space is limited, high power photos can be removed.

Level of interest: An article of importance in its field

Quality of written English: Acceptable

Statistical review: No, the manuscript does not need to be seen by a statistician.
