Reviewer’s report

Title: Multiple Branch Retinal Vein Occlusions Associated with Quetiapine Fumarate

Version: 1 Date: 6 April 2011

Reviewer: Osman Cekic

Reviewer’s report:

Please avoid using unnecessary abbreviations such as VA, RAPD, SGA. It is better to present the case as association of multiple BRVO and Quetiapine, as it may be just a coincidence.

Level of interest: An article whose findings are important to those with closely related research interests

Quality of written English: Acceptable

Statistical review: No, the manuscript does not need to be seen by a statistician.

Declaration of competing interests:
