Reviewer's report

Title: Glial heterotopia of the orbit: A rare presentation

Version: 3 Date: 24 July 2011

Reviewer: Hayyam Kıratlı

Reviewer's report:

Discretionary Revisions
1. The authors might wish to put a brief comment on why this child presented so late.
2. The authors need to explain what the arrow on the histopathology slide shows.
3. A postoperative view of the patient may be useful to assess the impact of orbital surgery.
4. Late follow-up information is essential since these tumors tend to recur even if excised "completely" from the surgeon's point of view.

Level of interest: An article whose findings are important to those with closely related research interests

Quality of written English: Acceptable

Statistical review: No, the manuscript does not need to be seen by a statistician.
