Reviewer's report

Title: High-dose antioxidants for central serous chorioretinopathy; The randomized, placebo-controlled study.

Version: 4 Date: 26 April 2012

Reviewer: Michael Marmor

Reviewer's report:

The English in the paragraph on page 12 remains terrible. E.g. "choroid" is NOT a plural word! And "cause some patients had slower" is incorrect grammar. Say "cause some patients to have..."
Replace sentence "The choroids..." with "If the choroid were attacked by oxidative radicals, this could have secondary effects on the RPE, followed...."

Level of interest: An article whose findings are important to those with closely related research interests

Quality of written English: Needs some language corrections before being published

Statistical review: No, the manuscript does not need to be seen by a statistician.
