Reviewer's report

Title: Fibrin membrane pupillary-block glaucoma after uneventful cataract surgery treated with intracameral tissue plasminogen activator: a case report

Version: 1 Date: 2 March 2012

Reviewer: Parul Ichhpujani

Reviewer's report:

Major Compulsory Revisions:
Would be nice if the authors explain why Diabetics are more prone to mount a fibrinious reaction? How was the glycaemic status of your patient during the course of this inflammatory episode?

Minor Essential Revisions:
Figure 1: Do the authors have a Diffuse illumination Slit photograph also?

Otherwise, a good case report.

Level of interest: An article of limited interest

Quality of written English: Acceptable

Statistical review: No, the manuscript does not need to be seen by a statistician.
