Reviewer's report

Title: Comparison of the Efficacy of Intravitreal Triamcinolone Acetonide for Branch Retinal Vein Occlusion With SRD Versus CME: Influence on Macular Sensitivity and Morphology

Version: 4 Date: 11 June 2012

Reviewer: Niral Karia

Reviewer's report:

The authors have addressed the points required from the primary review. In view of the changes made to the manuscript the title needs to be altered a little and should not have abbreviations i.e.

'Comparison of the Efficacy of Intravitreal Triamcinolone Acetonide for Branch Retinal Vein Occlusion With SRD Versus CME: Influence on Macular Sensitivity and Morphology'

should read something like:

'Comparison of the Efficacy of Intravitreal Triamcinolone Acetonide for Branch Retinal Vein Occlusion with cystoid macular edema with serous retinal detachment versus cystoid macular edema without serous retinal detachment: Influence on Macular Sensitivity and Morphology'

Level of interest: An article whose findings are important to those with closely related research interests

Quality of written English: Acceptable

Statistical review: No, the manuscript does not need to be seen by a statistician.
