Reviewer's report

Title: A comparison of the sensitivity of EQ-5D, SF-6D and TTO utility values to changes in vision and perceived visual function in patients with primary open-angle glaucoma

Version: 1 Date: 25 April 2012

Reviewer: Augusto Azuara-blanco

Reviewer's report:

The authors should be congratulated for this important contribution to the literature. This study will be very important for evaluating effectiveness of glaucoma interventions. Surprisingly there is very little published data about health states and utilities in glaucoma, and this study fills some major gaps.

Level of interest: An exceptional article

Quality of written English: Acceptable

Statistical review: No, the manuscript does not need to be seen by a statistician.
