Reviewer's report

Title: Recurrent Orbital Schwannomas: Clinical Course and Histopathologic Correlation.

Version: 2 Date: 16 August 2012

Reviewer: seema kashyap

Reviewer's report:

Discretionary Revisions

Dear Editor

My comments remain the same.
Regarding the first case I am not convinced about 2 different masses shown on MRI. The 2 masses seen could be one single mass which is seen as separate smaller mass due to the level at which MRI is done.
The second case is OK can be published

Ultimately the decision lies with the editor

Level of interest: An article of limited interest
