Reviewer's report

**Title:** Recurrent Symptomatic Intraocular Pressure Spikes during Hemodialysis in a Patient with Unilateral Anterior Uveitis: case report

**Version:** 1  **Date:** 17 November 2012

**Reviewer:** alireza R Ghaffarieh

**Reviewer's report:**

An interesting case report about recurrent symptomatic IOP Spikes during hemodialysis in a patient with unilateral anterior uveitis.

My questions "
1-Did patient develop sign of uveitis after surgery during HD again?
2-what is the condition of angle? Any PI?
3-What is the cause of uveitis?

**Level of interest:** An article whose findings are important to those with closely related research interests

**Quality of written English:** Needs some language corrections before being published

**Statistical review:** No, the manuscript does not need to be seen by a statistician.
