Reviewer's report

Title: Individual phenotypic variances in a family with Avellino corneal dystrophy.

Version: 3  Date: 16 February 2013

Reviewer: Rasik B Vajpayee

Reviewer's report:

The authors present two cases with Avellino corneal dystrophy with unusual phenotypic variations. The manuscript is well-written and the photographs are good. My specific comments on the manuscript are:

Minor comments

1. Did the authors screen for other mutations such as R124C?
2. What was the status of other family members, since there is no family tree?
3. The fundus photograph can be deleted.

Level of interest: An article of importance in its field

Quality of written English: Acceptable

Statistical review: No, the manuscript does not need to be seen by a statistician.
