Reviewer's report

Title: Diagnostic Techniques for Inflammatory Eye Disease: Past, Present and Future: a Review

Version: 1 Date: 13 March 2013

Reviewer: Yan Guex-Crosier

Reviewer's report:

This article offers a good review of diagnostic techniques in uveitis. Table 1 offers a very good overview of validity of PCR vs Goldmann-Witmer index (GWC) in major ocular infectious conditions.

A major limitation to measure a GWC is actually the wide development of automation of procedure and the lack of micro methods for ELISA measurement.

Level of interest: An article of importance in its field

Quality of written English: Acceptable

Statistical review: No, the manuscript does not need to be seen by a statistician.
