Reviewer’s report

Title: Establishment of the mild, moderate and severe dry eye models using three methods in rabbits

Version: 3 Date: 26 July 2013

Reviewer: wei chen

Reviewer’s report:

I had already reviewed this manuscript, and the authors responded accordingly except one comment:

In the Discussion, information in the first paragraph seems to be redundant, and there are too many words repeating those in the Results, which should be avoided as possible.

The authors need to revise manuscript again.

Level of interest: An article whose findings are important to those with closely related research interests

Quality of written English: Acceptable

Statistical review: No, the manuscript does not need to be seen by a statistician.

Declaration of competing interests:

I declare that I have no competing interests.
