Reviewer's report

Title: Indapamide-induced transient myopia with supraciliary effusion: case report

Version: 2 Date: 31 August 2013

Reviewer: frederick T fraunfelder

Reviewer's report:

This paper is well written and fully researched. The paper might be improved by shortening some what...especially the history. A third report of of a adverse drug related ocular side effect is important since it is very well documented. As the first report usingUBM adds some understanding to causation.

Level of interest: An article whose findings are important to those with closely related research interests

Quality of written English: Acceptable

Statistical review: No, the manuscript does not need to be seen by a statistician.

Declaration of competing interests:
