Reviewer's report

Title: A case with transient refractive change after removal of pituitary tumor

Version: 2 Date: 16 December 2012

Reviewer: David Goldblum

Reviewer's report:

The authors report 62-year-old woman who experienced a temporary refractive change after trans-sphenoidal surgery.

Major Compulsory Revisions
What was the corrected visual acuity during the refractive change?
Please provide the keratometry data before during and after the change.

Level of interest: An article whose findings are important to those with closely related research interests

Quality of written English: Acceptable

Statistical review: No, the manuscript does not need to be seen by a statistician.
