Reviewer’s report

Title: MAPK activation in mature cataract associated with Noonan syndrome

Version: 2 Date: 2 October 2013

Reviewer: Ahmad Mansour

Reviewer’s report:

Hashida et al in their revised version of the manuscript "MAPK activation in mature cataract associated with Noonan syndrome" have answered in full the critiques raised by the reviewers and have improved significantly their submission. The case report is well written with ample tackling of the literature and therefore I recommend highly acceptance for publication in its present form due its contribution to the pathogenesis of cataract in Noonan syndrome

Level of interest: An article of outstanding merit and interest in its field

Quality of written English: Acceptable

Statistical review: No, the manuscript does not need to be seen by a statistician.
