Reviewer's report

**Title:** Alteration of choroidal thickness in a case of carotid cavernous fistula: a case report and a review of the literature

**Version:** 3  **Date:** 21 August 2013

**Reviewer:** Hemant Khanna

**Reviewer's report:**

1. The authors show the use of EDI-OCT in the diagnosis of CCF. However, their claims do not advance from the work reported in this manuscript. The use of EDI-OCT to diagnose this disease cannot be demonstrated sing one case.

**Level of interest:** An article of insufficient interest to warrant publication in a scientific/medical journal

**Quality of written English:** Acceptable

**Statistical review:** No, the manuscript does not need to be seen by a statistician.
