Reviewer's report

Title: Laser in situ keratomileusis for astigmatism of 0.75 diopter or less combined with low myopia: A retrospective data analysis

Version: 1 Date: 21 August 2013

Reviewer: ALBERTO ARTOLA

Reviewer's report:

The paper is good and the recommendation is accepted. This paper is very similar to other of the same authors published in March in Journal of Cataract and Refractive Surgery. The only difference is that in the present paper the study is in low myopia with low astigmatism vs the other paper that study included high myopia whit low astigmatism

Level of interest: An article of importance in its field

Quality of written English: Acceptable

Statistical review: No, the manuscript does not need to be seen by a statistician.
