Reviewer's report

Title: Correlation between structure/function and optic disc microcirculation in myopic glaucoma, measured with laser speckle flowgraphy

Version: 1 Date: 24 July 2014

Reviewer: Luciano Quaranta

Reviewer's report:

Nice and well written paper on very tricky topic for glaucoma specialists.
I suggest some minor revisions.

Patients and methods
Blood pressure and blood pressure medications assumption should be considered in the analysis? Please specify this point

Discussion
page 16 when speaking about the effect of glaucoma medications on perfusion pressure please refer and cite three study of Quaranta and coworkers
When speaking about limitation of the study please state that these results were obtained on patient of Japanese ethnicity and perhaps should not be translated to other races.

Level of interest: An article of importance in its field

Quality of written English: Acceptable

Statistical review: Yes, and I have assessed the statistics in my report.
