Reviewer's report

Title: Homocysteine, MethyleneTetrahydrofolate Reductase C677T Polymorphism, and Risk of Retinal Vein Occlusion: An Updated Meta-analysis

Version: 2 Date: 7 September 2014

Reviewer: Gianluca Sottilotta

Reviewer's report:

Discretionary Revisions
The meta-analysis is well written, detailed and complete in all its parts. My opinion is that there are some revisions that could be done to improve the article: in the "results" paragraph should be clearly indicated that was not found association between the MTHFR C677T genotype and RVO, as it is written correctly in other parts of the article. It is also my opinion that the "Discussion" is too long and redundant, and for this reason can be shortened. The fourteenth reference is written in a wrong way: in fact, the last author is "Trapani Lombardo V" and not "Trapani LV"

Level of interest: An article of importance in its field

Quality of written English: Acceptable

Statistical review: No, the manuscript does not need to be seen by a statistician.
