Reviewer's report

Title: Adjusted Color Probability Codes for Peripapillary Retinal Nerve Fiber Layer Thickness in Healthy Koreans

Version: 1 Date: 3 January 2014

Reviewer: Sang-Woo Park

Reviewer's report:

Discretionary Revisions

1. I thought the scale (n=166) of this study is too small to represent the healthy korean. how do you cover the selection bias?

2. In the last paragraph of discussion, the content after ' in addition' may be better to move introduction or the forepart of discussion.

3. In the 7th line of the 8th page, the word 'thickness' are repeated. one word has to be removed.

Level of interest: An article whose findings are important to those with closely related research interests

Quality of written English: Acceptable

Statistical review: No, the manuscript does not need to be seen by a statistician.
