Reviewer’s report

Title: Congenital cystic eye associated with a low-grade cerebellar lesion that spontaneously regressed

Version: 1 Date: 21 April 2014

Reviewer: Paolo G Morselli

Reviewer’s report:

The article reports an interesting case of congenital cystic eye associated with a lesion of suspected glial origin. The report stresses the importance of early imaging to define the right clinical attitude.

Level of interest: An article whose findings are important to those with closely related research interests

Quality of written English: Acceptable

Statistical review: No, the manuscript does not need to be seen by a statistician.
