Reviewer's report

Title: Anterior Vault and Relative Lens Vault in Subjects with Angle Closure

Version: 2  Date: 25 June 2014

Reviewer: Sasan Moghimi

Reviewer's report:

This is an interesting study that defined some new anterior segment parameter like Anterior Vault and Relative Lens Vault in Subjects with Angle Closure. The manuscript is well-written and the design is acceptable.

Specific comment:

It's better to report the parameters in PAC and PACG cases separately.
The angle parameters in each group should mentioned in a table. Was there any PAS in PACG group?

Level of interest: An article of importance in its field

Quality of written English: Acceptable

Statistical review: No, the manuscript does not need to be seen by a statistician.
