Version: 1 Date: 3 Mar 2003

Reviewer: William V Good

Level of interest: A paper of limited interest

Advice on publication: Accept after discretionary revisions

This interesting paper describes the design of the Tehran Eye Study. The authors are implementing a very important project. On page 5, is the precision of the study 0.005? Or is it 0.05?

Even though there are no results to publish, I would recommend a conclusion to the abstract to tell the reader what he or she will learn by reading the design paper, and what the results in the future could tell us.
