Reviewer's report

Title: Refractile superficial retinal crystals and chronic retinal detachment: Case Report

Version: 1  Date: 21 August 2005

Reviewer: Periklis D Brazitikos

Reviewer's report:

General

-------------------------------------------------------------------------------

Major Compulsory Revisions (that the author must respond to before a decision on publication can be reached)
1. I do not quite understand, or you do not explain clearly why the glistening opacities were only in the perifoveal retina and not scattered throughout the entire posterior pole
2. You do not quite see this finding with other forms of longstanding RDs; How was the state of the macula in the fellow eye?

-------------------------------------------------------------------------------

Minor Essential Revisions (such as missing labels on figures, or the wrong use of a term, which the author can be trusted to correct)
NONE

-------------------------------------------------------------------------------

Discretionary Revisions (which the author can choose to ignore)
NONE

-------------------------------------------------------------------------------

What next?: Accept after discretionary revisions

Level of interest: An article of limited interest

Quality of written English: Acceptable
