Reviewer’s report

Title: Acute Red Eye and Back Pain as a Presentation for Systemic Illness: Case Report

Version: 1 Date: 15 August 2006

Reviewer: Muhammad Tariq Bhatti

Reviewer’s report:

General

A nice illustrative (teaching) case of endogenous endophthalmitis but does not add much to the existing literature, in terms of new findings.

Major Compulsory Revisions (that the author must respond to before a decision on publication can be reached)

Minor Essential Revisions (such as missing labels on figures, or the wrong use of a term, which the author can be trusted to correct)

Discretionary Revisions (which the author can choose to ignore)

What next?: Reject because scientifically unsound

Level of interest: An article of insufficient interest to warrant publication in a scientific/medical journal

Quality of written English: Acceptable

Statistical review: No

Declaration of competing interests:
