Reviewer's report

Title: Radiation Retinopathy: Case Report and Review

Version: 3 Date: 16 January 2007

Reviewer: Ahmet Kaan Gunduz

Reviewer's report:

General
This report provides no new information over what has already been described in the literature. It describes a patient with nasal SCC who developed radiation retinopathy after surgical excision and EBRT. The patient was treated with panretinal photocoagulation. No follow-up is provided.

Major Compulsory Revisions (that the author must respond to before a decision on publication can be reached)

Minor Essential Revisions (such as missing labels on figures, or the wrong use of a term, which the author can be trusted to correct)

Discretionary Revisions (which the author can choose to ignore)

What next?: Reject because too small an advance to publish

Level of interest: An article of insufficient interest to warrant publication in a scientific/medical journal

Quality of written English: Acceptable

Statistical review: No, the manuscript does not need to be seen by a statistician.

Declaration of competing interests:
