Reviewer's report

Title: Assessment of Stereoscopic Optic Disc Images using an Autostereoscopic Screen. Experimental study.

Version: 2 Date: 20 May 2008

Reviewer: Chris J Rudnisky

Reviewer's report:

There are no required major revisions.

I like the paper better now that the quality comparisons have been removed. However, there are a few stray references to that portion of the paper that linger. This should be addressed: see pg 5, paragraph 3, and pg 7, last paragraph.

Level of interest: An article whose findings are important to those with closely related research interests

Quality of written English: Acceptable

Statistical review: No, the manuscript does not need to be seen by a statistician.

Declaration of competing interests:

I have no new competing interests to report; please see my comments from the previous review.
