Reviewer’s report

Title: The ChromaTest, a Digital Color Contrast Sensitivity Analyzer, for Diabetic Maculopathy

Version: 5 Date: 29 July 2008

Reviewer: Keith A Goatman

Reviewer’s report:

All comments addressed except:

"The authors must indicate precisely how they calculated these threshold levels."

I have asked this several times - it is a crucial element of the methodology. It should be a simple matter to say how the pass/fail threshold levels were calculated for each two decade age range and say what these values were.

Level of interest: An article whose findings are important to those with closely related research interests

Quality of written English: Acceptable

Statistical review: Yes, but I do not feel adequately qualified to assess the statistics.
