Reviewer's report

Title: Nasal Carriage and Antimicrobial Susceptibility of Staphylococcus aureus in healthy preschool children in Ujjain, India

Version: 2 Date: 8 December 2010

Reviewer: Jan L Nouwen

Reviewer's report:

Reading the responses of the authors to the issues raised before, most issues are tackled adequately in my opinion.

Major Compulsory Revisions: none

Minor Essential Revisions:

. The Co-resistance table does not really add to the message of the article; it's a very difficult to read table, so my advise would be to delete it.
. In Figure 2 (MRSA) no data are given on cipro- and levofloxacin nor doxycyclin sensitivity or resistance; please add.

Level of interest: An article whose findings are important to those with closely related research interests

Quality of written English: Acceptable

Statistical review: No, the manuscript does not need to be seen by a statistician.

Declaration of competing interests:
