Reviewer’s report

Title: Use of manual and powered wheelchair in children with cerebral palsy: a cross-sectional study

Version: 6 Date: 12 August 2010

Reviewer: Annet J Dallmeijer

Reviewer’s report:

The authors did an adequate second revision of the paper by addressing most of the issues that were raised in the review process. The result section is clearer now and easier to follow, and the research question is refined. There remains some disagreement about the interpretation of results but that is acceptable to me.

Minor Revision:
I would suggest to refer to one of the papers in the special issue of Dev Med Child Neurol 2007, 49(s109) rather than referring to the whole issue. For reference #1 you can refer to the Rosenbaum paper (p. 8-14).

Level of interest: An article whose findings are important to those with closely related research interests

Quality of written English: Acceptable

Statistical review: No, the manuscript does not need to be seen by a statistician.
