Reviewer's report

**Title:** Effect of a multi-faceted quality improvement intervention on inappropriate antibiotic use in children with non-bloody diarrhoea admitted to district hospitals in Kenya.

**Version:** 1  **Date:** 6 June 2011

**Reviewer:** Michiel Costers

**Reviewer's report:**

No revisions needed.

The title and abstract accurately convey the aim and results of the study.
The study question is well defined.
The methods are appropriate and well described.
The data are sound.
The discussion is supported by the data.
Limitations of the study are clearly stated.

**Level of interest:** An article of importance in its field

**Quality of written English:** Acceptable

**Statistical review:** Yes, but I do not feel adequately qualified to assess the statistics.

**Declaration of competing interests:**

I declare that I have no competing interests.
