Reviewer's report

Title: Predictors of well child care adherence over time in a cohort of urban Medicaid-eligible infants

Version: 3 Date: 13 April 2011

Reviewer: Paul J Chung

Reviewer's report:

This revision conscientiously addresses reviewer comments and is a stronger manuscript. No additional revisions (beyond wordsmithing for galleys) seem essential at this point. The authors might consider placing sensitivity analyses in the analysis section of the methods for better coherence, but that's entirely discretionary.

Level of interest: An article whose findings are important to those with closely related research interests

Quality of written English: Acceptable

Statistical review: No, the manuscript does not need to be seen by a statistician.

Declaration of competing interests:

I declare that I have no competing interests.
