Reviewer's report

Title: Brain iron accumulation in unexplained fetal and infant death victims with smoker mothers - The possible involvement of maternal methemoglobinemia

Version: 2 Date: 16 February 2011

Reviewer: Nadja W Schroder

Reviewer's report:

After reading carefully the revised version of the manuscript and the authors' responses, I can conclude that my original criticisms have been answered. I also feel that the manuscript was improved by the inclusion of recommendations made by the other reviewers. Based on that, I can recommend the publication of the manuscript by Lavezzi et al in BMC Pediatrics in the present form.

Level of interest: An article of importance in its field

Quality of written English: Acceptable

Statistical review: No, the manuscript does not need to be seen by a statistician.

Declaration of competing interests:

I declare that I have no competing interests.
