Reviewer's report

Title: A decision aid for considering indomethacin prophylaxis vs. symptomatic treatment of PDA for extreme low birth weight infants

Version: 3 Date: 28 April 2011

Reviewer: Rebecca Randell

Reviewer's report:

I am happy that the authors have adequately responded to my previous review.

Minor Essential Revisions
1. The paper still requires careful proof reading before it can be published, e.g. in the first line of Background, should be ',' not ';'; under 'Expert's feedback', should be 'content' not 'contents' and 'feedback' not 'feed back'.

Discretionary Revisions
2. The authors could give more information about decision aids and their benefits - examples rather than just references.

Level of interest: An article whose findings are important to those with closely related research interests

Quality of written English: Needs some language corrections before being published

Statistical review: No, the manuscript does not need to be seen by a statistician.

Declaration of competing interests:
