Reviewer’s report

**Title:** Duration of exclusive breastfeeding; validity of retrospective assessment at nine months of age

**Version:** 2  **Date:** 12 April 2011

**Reviewer:** Upul Senarath

**Reviewer’s report:**

Thanks for referring this manuscript for the 2nd review. The authors have satisfactorily addressed the points so the paper can be recommend for publication.

I wish to highlight some minor points which authors can address and proceed (I may need not to see again)

1. spelling error on Page 9. 'complimentary feeding' should be changed to 'complementary feeding'.
2. Second on Page 9 - Authors should add evidence for high female literacy in Sri Lanka - what is the literacy rate with reference for it.
