Title: Evaluation Of Splanchnic Oximetry, Doppler Flow Velocimetry In The Superior Mesenteric Artery And Feeding Tolerance In Very Low Birth Weight IUGR And Non-IUGR Infants Receiving Bolus Versus Continuous Enteral Nutrition

Version: 3 Date: 28 June 2012

Reviewer: Gerd Schmalisch

Reviewer's report:

My open questions were answered sufficiently. I hope that the estimated sample size will be sufficient to give reliable answers to this interesting study.

Level of interest: An article of importance in its field

Quality of written English: Acceptable

Statistical review: No, the manuscript does not need to be seen by a statistician.
