Reviewer's report

Title: Exploring the Usefulness of Comprehensive Care Plans for Children with Medical Complexity (CMC): A Qualitative Study

Version: 3 Date: 4 January 2013

Reviewer: Linda Lindeke

Reviewer's report:

The authors provided very detailed and specific responses to each reviewer concern and have thereby greatly improved the manuscript's readability, logical development and comprehensiveness. They are to be applauded for their diligence in responding to the reviews.

For some reason the authors want to emphasize that their article is the first to do this sort of work. While that may be true, it seems unnecessary to make this assertion; indeed, their study is uniquely and appropriately designed. Stressing that it is the first is not necessary.

Level of interest: An article of importance in its field

Quality of written English: Acceptable

Statistical review: No, the manuscript does not need to be seen by a statistician.

Declaration of competing interests:
