Reviewer's report

Title: Health related quality of life of obese adolescents in Kuwait

Version: 1 Date: 15 April 2013

Reviewer: Nemeh Al-Akour

Reviewer's report:

Abstract
Objective: There is no hypothesis is written that will be tested.
Methods: The authors did not describe the methods clearly
Conclusions: should reflect the results of the study????

Text of the study
Background:
In many instances throughout the manuscript (Background, Discussion, and Statistical analysis and study power) the authors acknowledged that there are no studies have been published on associations between obesity and HRQL in adolescents from the Arab countries. Actually there are some published papers and the authors can find them. For, example:

Data analysis:
I am so confusing with the study results reporting. I think the results need to be rewrite with organization with the tables.

Discussion:
The authors did not acknowledge the research have been published in Jordan or Lebanon or other Arab Countries.
