Reviewer's report

**Title:** Clinical Spectrum of Rhabdomyolysis Presented to Pediatric Emergency Department

**Version:** 4  **Date:** 25 August 2013

**Reviewer:** walter verbrugghe

**Reviewer's report:**

The authors pointed out clearly the limitations of the study in the discussion. It remains a small number of patients for a condition that is not so rare even in children (at least in our database). The English language improved dramatically. The other points were also addressed in the new manuscript.

**Level of interest:** An article of limited interest

**Quality of written English:** Acceptable

**Statistical review:** No, the manuscript does not need to be seen by a statistician.

**Declaration of competing interests:**
