Reviewer's report

**Title:** Severe late-onset multisystem cytomegalovirus infection in a premature neonate previously treated for congenital infection

**Version:** 2 **Date:** 16 June 2013

**Reviewer:** Margaret Fisher

**Reviewer's report:**

1. Major Compulsory Revisions - none recommended
2. Minor Essential Revisions - none recommended
3. Discretionary Revisions: This is a well written case report which provides information that is new: in this case, relapse and severe infection in a prematurely born infant treated for congenital cytomegalovirus. I would suggest the following: every reader will wonder what happened to the other twin; it would be appropriate to comment and (2)

**Level of interest:** An article of importance in its field

**Quality of written English:** Acceptable

**Statistical review:** No, the manuscript does not need to be seen by a statistician.
