Reviewer's report

Title: Early feeding of fortified breast milk and in-hospital-growth in very premature infants: a retrospective cohort analysis

Version: 2 Date: 13 September 2013

Reviewer: Reg S Sauve

Reviewer's report:

I think most of my suggestions are in the category of discretionary reviews - I would find it better to read this manuscript if there was a table of basic/demographic characteristics and it would be better if they would say why these cohorts were separated in time.

Level of interest: An article of importance in its field

Quality of written English: Acceptable

Statistical review: No, the manuscript does not need to be seen by a statistician.
