Reviewer's report

Title: Comparing the growth of preterm infants through the gestational period of 37 to 50 weeks with the reference fetus

Version: 5 Date: 19 April 2013

Reviewer: David Tudehope

Reviewer's report:

Authors have submitted amended manuscript and responded to suggestions made by 3 reviewers. Authors have appropriately responded to my minor suggestions to improve text.

Authors have provided clear legends and presentations for figures 4-9.

However, the size and clarity of figures 1-3 available for this reviewer were unsatisfactory. The legends are still unsatisfactory and don't adequately describe these 3 figures. The small size of the figure available for me to view was small and figure appeared as a mass of confusing lines.

I request Editor and Journal production team to sort out problems with legends and clarity for figures 1-3.

Level of interest: An article of importance in its field

Quality of written English: Acceptable

Statistical review: No, the manuscript does not need to be seen by a statistician.
