Reviewer's report

**Title:** Reduced Crying in Term Infants Fed High Beta-Palmitate Formula: A Double-Blind, Randomized, Clinical Trial

**Version:** 2  
**Date:** 10 March 2014

**Reviewer:** James Renner

**Reviewer's report:**

Thank you for asking me to assess the manuscript referred to above. In keeping with the guidelines provided, I have made the following observations:

1. The question posed was well defined
2. The method was appropriate and well described
3. Yes the data are sound
4. The answer to this is yes.
5. The discussion and conclusion are balanced and adequately supported by data.
6. Limitations of the study were stated and valid
7. References of similar works were provided. Their previous work was referenced though incorrectly. This is pointed out in the edited manuscript attached
8. Yes title and abstract reflect the essence of the work
9. The writing is acceptable

10 ADDITIONAL COMMENTS. I have made some observations and comments in the body of the work. This is to enhance the quality of the work. Please see the attachment. The tables and figures are not in the attachment. I am quite satisfied with them.
